

Hello Arches Academy School Family!

My name is Spencer Livermore. I am the Science Teacher at Arches Academy. Everything that I do in my life is directly connected to my work with, and passion for, Science. My specialities are the Life Sciences, especially Biology, which I have my degree in. Between my classroom at Arches Academy and my home, I have over 30 reptiles or aquariums that I take care of. When I finish my teaching day at Arches, I head over to work at Animal Ark in Orem, a local pet store. I breed pythons, freshwater fish, earthworms, anemones, cockroaches, and gerbils.

You can probably tell that I am fully hands-on with Science! The experience, knowledge, and passion that I have directly flows into my science classes. In the classroom, students have opportunities to interact with the animals on a weekly basis, and use them as objects of study for unit projects. In addition, our school greenhouse enables us to have the same hands-on experience with Botany and Horticulture. Students also have opportunities to assist in periodically raising money for the science program by helping me breed, raise, and sell gerbils, axolotls, and earthworms. These are just a fraction of the experiences your child will have in my class! Science at Arches Academy is the real-deal, hands-on science that you want for your child.

I hope to meet you soon,

Spencer Livermore
